EPA is committed to working closely with response agencies and state and local officials to ensure the safety of citizens, respond to concerns and to evaluate impact to water contaminated by the Gold King Mine Release. EPA is sharing information as quickly as possible with the public as experts work to evaluate any effects the spill may have on drinking water, public health, agriculture, fish and wildlife.

Please see our website for the latest information: <http://www2.epa.gov/region8/gold-king-mine-release-emergency-response>

Regular updates will be posted as they are available.

Hello EPA Region 8,

It was recommended that I contact the Denver EPA office with my inquiry; please see my previous email below.

Thanks for your time!

Hi **Citizen Name/Ex. 6**

Thank you for reaching out. We have an EPA regional office in Colorado, I suggest

reaching out directly to them.

Here is a link to their website with their contact information:
<http://www2.epa.gov/aboutepa/epa-region-8-mountains-and-plains>

You can also follow @EPAjobs for more information on job opportunities around the US.
<https://twitter.com/EPAjobs>

Thanks,

Rachel

To whom it may concern,

I am a senior in Geophysics at the Colorado School of Mines in Golden, Colorado. I hope to find a career in environmental remediation or hazard mitigation after graduate school, and I would like to offer my time and labor to help with the spill near Durango, Colorado. I understand there are hazardous materials in question and I'm sure helping directly would require training, so I understand if there are no volunteer positions available.

However, if I can assist in any way, I would love to volunteer and do my part in cleaning up,

whether it be helping in the office or the field

. In conclusion, if there is any need for volunteers on this project, please keep me in mind.

Thank you for your time!
